

1100 WALKERS LINE COVID PROTOCOLS

In preparation for our tenants to return to the building under modified guidelines, the management team has:

- Repainted and refreshed all common areas
- Windows and common areas including stairwells deep cleaned with hospital-grade sanitizers
- New HVAC filters installed and airflow increased to maximum levels

On a daily basis, at 1100 Walkers Line:

- Hand sanitizer stations are located in multiple spots on each floor as well as in the mailroom, and at each stairwell and elevator door. They are re-filled daily
- Key common areas are sanitized multiple times daily, especially in high contact touchpoints such as door handles and elevator buttons
- All tenants are held to the Kamisa mask guidelines
- Reusable masks are available on-site, if you have a visitor who needs a mask please check with us and we will supply one. Supplies may be limited.
- Durabond, our cleaning company has enacted enhanced procedures and added approved products that sanitize surfaces against harbouring Covid viruses.
- Social distancing guidelines are in place for the elevator and other common areas. Signs are clearly posted at each elevator door as a reminder
